EDUCATION

Bachelor of Science in Computer Science & Engineering (CSE)
at American International University-
Bangladesh
Expected Graduation: 2026
CGPA: 3.10(Current)

HIGHER SECONDARY CERTIFICATE (HSC)
Government Sundarban Adarsha College
GPA: 5.00

TECHNICAL SKILLS

Programming Languages:

•Python • C# • PHP • JavaScript • SQL • HTML5 • CSS3

Data Science & Machine Learning:

•TensorFlow • Scikit-learn • Pandas • NumPy •
Data Cleaning • Data Visualization • Feature
Engineering • Model Evaluation • Predictive
Analytics

Databases:

•MySQL • Microsoft SQL Server

Development Tools:

•Git • GitHub • Visual Studio • VS Code Google
Colab • RStudio • MATLAB

Core Competencies:

•Machine Learning • Software Development •
REST APIs • Database Design • Object
Oriented Programming • Version Control •
Problem Solving • Analytical Thinking

LANGUAGE

- English
- Bengali

PROFESSIONAL SUMMARY

Computer Science and Engineering student at the American International University-Bangladesh (AIUB) with a strong foundation in Data Science, Machine Learning, Artificial Intelligence, and Software Engineering. Passionate about developing intelligent systems, building scalable applications, and transforming complex datasets into meaningful insights. Experienced in full-stack software development, database design, predictive modeling, and analytical problem-solving through academic and personal projects. Adept at learning new technologies quickly, collaborating within teams, and delivering practical solutions to real-world challenges.

FEATURED PROJECTS

TripSyncX – Smart Ticket Management System

PHP

JavaScript

HTML

MySQL

- Developed a responsive web-based ticket management platform supporting user registration, authentication, and ticket booking.
- Designed and optimised a relational database for efficient customer and booking management.
- Implemented secure authentication and role-based access control.
- Built an intuitive user interface focused on accessibility and performance.

MetroRail Management System

JAVA

SQL

- Designed and developed a desktop application for metro rail operations and passenger management.
- Implemented train scheduling, route management, and database integration.
- Applied object-oriented programming principles to create scalable and maintainable software.

Music Streaming Platform

C#

.NET

- Developed a desktop music streaming application with playlist management and playback functionality.
- Built a user-friendly graphical interface using Windows Forms.
- Focused on modular architecture and reusable software components.

Banking Data Analytics & Machine Learning: Customer Behavior Analysis and Predictive Modelling

R

HTML

- Developed machine learning models for predictive analytics using real-world datasets.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA).
- Evaluated models using industry-standard performance metrics.
- Applied visualization techniques to communicate analytical insights effectively.

RELEVANT COURSEWORK

- Machine Learning
- Artificial Intelligence
- Data Structures & Algorithms
- Database Management Systems
- Software Engineering
- Object-Oriented Programming (OOP)
- Data Communication
- Computer Networks
- Operating Systems
- Computer Architecture
- Web Technologies
- Discrete Mathematics
- Probability & Statistics
- Linear Algebra
- DATA WAREHOUSING AND DATA MINING
- MANAGEMENT INFORMATION SYSTEMS

ACHIEVEMENTS & ACTIVITIES

- Completed multiple projects in Data Science, Machine Learning, and Software Development.
- Actively participate in coding challenges and problem-solving.
- Continuously exploring new technologies and frameworks.
